### STANDARD OF REVIEW

### FINDINGS

The Corporation hereby makes the following findings and determinations with respect to the Application, as required by Section 13.6 of the By-Laws and Section 5.7 of the Administrative Regulations:

- A. Application and Information Supplied is Complete. The Application is complete and contains all information required and necessary to make the findings and determinations set forth below.
- B. Consistency with Reuse Plan. The proposed uses and development program are in general conformity to the Reuse Plan (as defined in the By-Laws) containing a mix of uses. This is a revision to the Existing Phase 1A Development Plan Approval, which was the first development plan submitted for any development within NAS South Weymouth. Therefore, with the exception of the Existing Phase 1A Development Plan, there have been no other building permits, special permits or development plans that have been approved or issued.
- C. Consistency with Purposes.
  - The proposed uses and development program are consistent with the general purposes of the By-Laws.
  - The proposed uses and development program are consistent with the applicable purposes and objectives set forth in the various Articles of the By-Laws and the Regulations (as defined in the By-Laws) and as set forth for the

zoning districts in which the proposed uses and development program are to be located.

- D. Consistency with Other Developments. This is a revision to the Existing Phase 1A Development Plan Approval, which was the first development plan submitted for any development within NAS South Weymouth. Therefore, with the exception of the Existing Phase 1A Development Plan, there is no adjacent development within NAS South Weymouth and no building permits, special permits or development plans have been approved or issued.
- E. Compliance with Standards for Development Plans.
- The proposed uses and development program comply fully with the standards and criteria set forth in Article 13 of the By-Laws and in the Regulations (as defined in the By-Laws).
  - The Corporation has imposed conditions and/or safeguards, enumerated below, to adequately ensure that the proposed uses and development program shall operate or continue to operate in conformity with required standards and criteria.
- F. Consistency with Zoning Standards. The proposed uses and development program comply fully with the By-Laws and the Regulations (as defined in the By-Laws), including all applicable zoning requirements (use, density, locational, dimensional, and design standards) and the specific standards of the zoning districts in which the proposed uses and development program are to be located.
- G. Site and Area Compatibility. The proposed uses and development program are designed in a manner that is compatible with the existing natural features of the site and are compatible with the characteristics of the built environment and surrounding natural areas, including adjacent land uses.
- H. Modification of Density of Use. The proposed uses and development program do not have the potential to adversely impact the area surrounding its site due to its size and density. Accordingly, the Corporation is not requiring modification to the size of the proposed uses, structures, buildings or other improvements or the selection of different Building Forms (as defined in the By-Laws).
- I. Orientations of Vehicular/Pedestrian Access Ways and Ground Floor Uses. The Corporation has considered the context of the project site in terms of its locational attributes and the nature of abutting land uses, and established the degree of compatibility of proposed uses with adjacent existing or approved uses. However, in connection with approving the revisions to the Existing Phase 1A Development Plan, the Corporation is not requiring that the proposed vehicular and pedestrian access ways and/or the uses and occupancies of the ground floor of a building be

physically situated and oriented to face adjacent streets or pedestrian ways. These issues will be subject to review and approval during Site Plan Review (as defined in the By-Laws).

- J. Signage. The revisions to the Existing Phase 1A Development Plan do not propose any signage. The location of, and controls for, the lighting of free-standing signs and any other allowable sign that would be visible from a residential use, shall be in accordance with the provisions of the Regulations (as defined in the By-Laws) applicable to signs. All signs shall be subject to review and approval during Site Plan Review (as defined in the By-Laws).
- K. Documentation of Findings. The Corporation finds no need to require alteration or modification of proposed uses, structures, buildings, or other development under the standards and criteria of Article 13 of the By-Laws.
- L. Master Plan Conformity. The proposed use and development are in general conformity to the Master Plan adopted and approved by the Corporation on April 29, 2005, resubmitted to the Corporation with all approved revisions incorporated on December 1, 2005, and are consistent with the goals and objectives of such master plan, taking into account all other development with NAS South Weymouth for which building permits, site plan approvals, special permits or development plans have been approved or issued.
- M. Regulatory Compliance. The proposed use and development are in compliance with all applicable provisions of the Regulations (as defined in the By-Laws) including, without limitation, the Architectural and Urban Design Standards and the Sustainable Design Standards and, subject to the conditions and safeguards discussed below, the Affordable and Workforce Housing Regulations (the "Housing Regulations").
- N. Plan Conformity. The proposed use and development are in substantial conformity with the applicable Street, Infrastructures and Utility, Landscape and Lighting Plans contained in the Subdivision Rules and Regulations of Naval Air Station (NAS) South Weymouth, except as modified or waived in the Subdivision Plan.

in substantially the form attached hereto as Exhibit A, with such changes as may be approved by the Chief Executive Officer of the Corporation and the Corporation's legal counsel (the "Amended MOU"), in the Norfolk County Registry of Deeds, as required by Section 6.1(C)(b)(3) of the Housing Regulations.
